

Advantages of eProcurement

An eProcurement solution is a seamless electronic connection between your company and a supplier to help you find products, place orders, receive invoices and make payments easily and efficiently.

All-Inclusive Solutions:

- **Punchout Catalog** - Access to the most up-to-date product and pricing information without calling to determine your price and inventory. With real-time pricing and product availability features, you can save time in the shopping process. You can also view and convert existing quotes.
- **Automation of transactions** - Integrates with your procurement system to help automate quote, order and invoice transactions and minimize manual intervention.

Benefits:

- Help Reduce Errors
- Lower Your Costs
- Provides Control and Visibility of Products
- Reduce Paper Transactions
- Control Unauthorized Spending
- Expedite Approval Process
- Reduce Delivery & Payment Cycle Times

Whether you have eProcurement software or an Enterprise Resource Planning (ERP) system, we can help reduce requisition-to-order costs and increase your invoice-to-purchase order matching.
